

# Mathematics Learning Journey

Mathematics is a universal language. We use it daily, whether we realise it or not, in both our personal life and at work. By studying mathematics, students gain an essential life skill which they will take with them as they progress through their academic studies and then in later life. Mathematics develops students' key skills in numeracy, mathematical reasoning and independence in handling and quantifying information, allowing them to think through a wide range of real-life situations.
